Dear Sir/Madam,

Revision in Rating by ICRA

This is to inform that ICRA has revised IDBI Bank Limited's (IDBI) Outlook to Positive from Stable while reaffirming the Long-Term Ratings at '[ICRA]A+' and its Short-Term Issuer Rating at '[ICRA]A1+'. The detailed report is attached herewith.

You are requested to kindly take the above intimation on record in terms of Regulations 30 & 51 of SEBI (LODR) Regulations, 2015.

Fixed Deposits Programme	-	-	[ICRA]A+ (Positive); Reaffirmed and outlook revised to Positive from Stable
Certificates of Deposit Programme	35,000.00	35,000.00	[ICRA]A1+; reaffirmed
Total	69,434.93	65,678.83	

*Instrument details are provided in Annexure I

Rationale

The revision in the outlook on the long-term rating of IDBI Bank Limited (IDBI) factors in the continued improvement in the profitability and capitalisation profile. The same is likely to sustain, given the high provision coverage on the non-performing assets (NPA), leading to a decline in the net NPA (NNPA) level. This has also led to a comfortable solvency¹ profile. The recent improvement in the capital cushions was largely driven by the improving earnings profile and modest book growth.

The ratings are based on the standalone credit profile of the bank, given the stated intent of Life Insurance Corporation of India (LIC) and the Government of India (GoI) to sell down/divest their shareholding in the bank. Despite the stated intention of the GoI and LIC to divest their ownership, the share of current and savings account (CASA) deposits and retail term deposits witnessed a steady growth, leading to an improved granularity in the deposit base. The bank's ability to continuously maintain and grow the core deposit base upon the change in ownership may, however, remain a monitorable.

ICRA also notes that the vulnerable loan accounts have reduced from previous levels, with the SMA²-1 and SMA-2 at 1.5% of standard advances (3.4% as on March 31, 2020) and the standard restructured book at 3.0% of standard advances as on June 30, 2022. The high provision coverage and the prudent provision of Rs. 1,253 crore (0.9% of standard advances), as on June 30, 2022, against the restructured book remain a source of comfort. While IDBI maintains the highest provision coverage ratio (PCR) among all banks, the fresh NPA generation rate has remained elevated partially because of slippages from restructured loans. The bank's ability to arrest incremental credit costs while ensuring timely recoveries will be a key driver of further improvement in the net profitability from the current level.

ICRA has withdrawn the rating assigned to the Rs. 3,756.1-crore Senior & Lower Tier II (Subordinated Bonds) as these are fully redeemed and no amount is outstanding against the same. The rating was withdrawn in accordance with ICRA's policy on withdrawal and suspension ([click here for the policy](#)).

¹ Solvency defined as (NNPAs + Net security receipts + Net non-performing investments) / Core capital)

² SMA is defined as a special mention account (SMA), which is an account exhibiting signs of incipient stress resulting in the borrower defaulting in the timely servicing of their debt obligations though the account has not yet been classified as an NPA as per the extant RBI guidelines; SMA-1 accounts are overdue by 31-60 days while SMA-2 accounts are overdue by 61-90 days. The SMA-level data is for the entire bank including exposures below Rs. 5 crore

Key rating drivers and their description

Credit strengths

Comfortable capitalisation and solvency profile – IDBI's capitalisation profile continued to improve with the Tier I ratio and the capital-to-risk weighted assets ratio (CRAR) at 17.13% and 19.57%, respectively, as on June 30, 2022, (13.64% and 16.23%, respectively, as on June 30, 2021). Accordingly, the overall solvency levels (excluding prudent provisions held by the bank) continued on an improving trajectory and stood at 6.6% as on June 30, 2022 against 10.7% as on June 30, 2021. The large-scale capital support from the GoI (Rs. 18,928 crore over FY2017-20) and LIC (Rs. 26,761 crore over FY2017-20) helped bring down the NNPA levels, which also supported an improvement in the capitalisation and the profitability over the last two years.

Although the GoI and LIC together hold 94.72% of the total equity in the bank, both have stated their intention to sell down/divest their stakes as well as hand over management control of the bank to prospective investors/buyers. While any change in IDBI's parentage will be a monitorable event, the ratings no longer factor in the parentage as it is expected to change in due course of time. The current rating levels are supported by IDBI's improved standalone credit profile with expectations that internal capital generation is likely to be sufficient for growth as well as for maintaining adequate cushion over the regulatory capital requirements.

Steady deposit base accompanied by decline in share of bulk deposits – With the share of bulk deposits moderating to 5.09% of total deposits as on June 30, 2022 (41% as on September 30, 2016) and the steady increase in CASA and retail deposits, the overall profile of the deposit base witnessed a steady improvement. This was partly attributable to the decline in the loan book following its placement in the prompt corrective action (PCA) framework. The share of low-cost CASA deposits has been increasing steadily and stood at 55.65% of total deposits as on June 30, 2022 compared to 27.69% as on September 30, 2016 and remained higher than the banking sector average, which stood at 44% as on March 31, 2022. Further, in line with the changing deposit mix, the differential in the cost of interest-bearing funds vis-à-vis the banking system average has improved.

While IDBI's deposit base remained stable despite its classification as a private sector bank in FY2019, its ability to continuously maintain and grow the core deposit base while maintaining a competitive cost of funds after a change in the ownership structure may remain a monitorable.

Credit challenges

Asset quality remains monitorable – Given the challenges posed by the Covid-19 pandemic, slippages remained elevated at Rs. 5,866 crore or 4.67% of standard advances in FY2022, which was higher than 2.12% in FY2021. Moreover, slippages remained elevated at 3.61% (annualised) in Q1 FY2023, partly due to the slippage of a few lumpy corporate restructured accounts during the quarter. However, it remains meaningfully below the peak levels seen in the past (23.16% in FY2018 and 13.71% in FY2017). Despite the elevated slippages, the high provision coverage maintained by the bank on the existing stock of NPAs at 94.89% (excluding written-off accounts) as on June 30, 2022 supported the low NNPA level at 1.25% as on June 30, 2022 (23.16% as on March 31, 2018). IDBI's total NPAs (including write-offs) stood at ~Rs. 78,000 crore as on June 30, 2022 and it has guided towards net cash recoveries of ~Rs. 4,000 crore in FY2023 (~Rs. 721 crore achieved in Q1 FY2023). Meaningful recoveries will help offset the impact of incremental credit costs and support the overall profitability though this remains contingent on the timing and quantum of recovery.

Further, ICRA notes that the overall vulnerable book, as indicated by the SMA-1, SMA-2 book and standard restructured advances, remained high at 4.53% of standard advances as on June 30, 2022. However, IDBI is carrying prudent provisions of Rs. 1,253 crore (0.9% of standard advances or 31% of the restructured book) as on June 30, 2022 against the restructured book, which is expected to mitigate any incremental stress that could emanate from this book.

Return metrics improve although sustainability to be seen – IDBI's earnings profile has seen a sustained improvement over the last two years, largely aided by the capital support from the GoI and LIC, which helped shore up the PCR on legacy NPAs. As a result, the overall credit costs were lower in FY2021-Q1 FY2023 than the past levels. Furthermore, profitability was supported by one-time income, including a tax refund of Rs. 353 crore in FY2022 (Rs. 1,313 crore in FY2021 and Rs. 178 crore in Q1 FY2023), and recoveries from written-off accounts amounting to Rs. 846 crore in FY2022 (Rs. 547 crore and Rs. 40 crore

in FY2021 and Q1 FY2023, respectively). Given the large written-off loans, the timing of recoveries from NPAs may continue to result in volatility in earnings.

IDBI utilised the increased cushion in earnings from these one-off items towards making full provisions towards the Stressed Asset Stabilisation Fund (SASF; provision of Rs. 1,534 crore in FY2022, Rs. 1,100 crore till FY2021) and stands fully provided for as on June 30, 2022. Notwithstanding this, the bank was able to report a return on assets (RoA) of 0.83% in FY2022 (0.46% in FY2021), which improved further to 1.04% (annualised) in Q1 FY2023. On a forward-looking basis, normalised operating profitability is expected to remain better compared to the past levels although elevated operational costs on a reduced scale will continue to weigh down the operating profitability. Further, recoveries from a meaningfully large pool of NPAs (including written-off accounts) could remain an upside.

Liquidity position: Strong

The daily average liquidity coverage ratio (LCR) remained strong at 142%³ for Q1 FY2023 and remained >140% during the last four quarters against the regulatory requirement of 100%, while the net stable funding ratio (NSFR) stood at 123% which was also well above the regulatory level of 100%. The bank's strong liquidity position in recent years was largely supported by a relatively low credit-to-deposit ratio and positive asset-liability mismatches (as per the structural liquidity statement as on June 30, 2022) across all the <1 year maturity buckets. Moreover, IDBI has an excess statutory liquidity ratio (SLR) position, which stood at ~10% above the regulatory level (18%) as on June 17, 2022. The excess SLR holding above the regulatory level can be utilised to avail liquidity support from the Reserve Bank of India (RBI; through repo) apart from the marginal standing facility of the RBI in case of urgent liquidity needs.

Rating sensitivities

Positive factors – ICRA could upgrade the rating if the bank is able to maintain a capital cushion of over ~300 basis points (bps) over the Tier I and improve the internal capital generation with an RoA of >1.0% on a sustained basis and with the solvency profile remaining better than 25%.

Negative factors – ICRA could change the outlook or downgrade the ratings if the bank reports a sustained weakening in the earnings profile, a decline in the capital cushions over the Tier I to less than 200 bps or a weakening in the deposit franchise.

Analytical approach

Analytical Approach	Comments
Applicable rating methodologies	ICRA's Rating Methodology for Banks ICRA's Policy on Withdrawal of Credit Ratings
Parent/Group support	Not applicable
Consolidation/Standalone	For arriving at the ratings, ICRA has considered the standalone financials of IDBI. However, in line with our limited consolidation approach, we have factored in the capital requirement of the key subsidiaries of the Group, going forward. In ICRA's view, IDBI's subsidiaries will largely remain self-sufficient in meeting their capital requirements in the near to medium term.

³ LCR at consolidated level

About the company

IDBI Bank Limited, founded in 1964, is a private sector bank headquartered in Mumbai. It was a public sector bank till February 2019 with the Gol holding a majority stake. In January 2019, LIC increased its stake in the bank to 51% by infusing capital of Rs. 21,624 crore, resulting in the dilution of the Gol's ownership to 46.46% as on January 24, 2019 from 85.96%. LIC maintained its holding at 51% during the subsequent capital raise of Rs. 9,300 crore in September 2020, while the Gol's share remained at a similar level of 47.11%. However, LIC and the Gol's stakes in the bank declined to 49.24% and 45.48%, respectively, after it raised capital via a qualified institutional placement (QIP) in FY2021. Given the decline in the Gol's majority shareholding, the RBI classified IDBI as a private sector bank w.e.f. March 2019. As on March 31, 2022, the bank had 1,886 branches and 3,403 ATMs.

The Complexity Indicator refers to the ease with which the returns associated with the rated instrument could be estimated. It does not indicate the risk related to the timely payments on the instrument, which is rather indicated by the instrument's credit rating. It also does not indicate the complexity associated with analysing an entity's financial, business, industry risks or complexity related to the structural, transactional or legal aspects. Details on the complexity levels of the instruments are available on ICRA's website: www.icra.in

Key features of the rated instruments

The servicing of the Basel II Lower Tier II Bonds, senior bonds and infrastructure bonds is not subject to any capital ratios and profitability. However, the Basel III Tier II Bonds are expected to absorb losses once the point of non-viability (PONV) trigger is invoked. The Basel III instrument is a hybrid subordinated instrument with equity-like loss-absorption features. Such features may translate into higher loss severity vis-à-vis conventional debt instruments.
